Life Settlement -Term Conversion

Mr. Wilson's 20-year term policy was reaching its conversion deadline. He was now 79 and was recently diagnosed with coronary artery disease. Mr. Wilson could not afford a conversion, and letting his \$250,000 policy lapse would leave him nothing.

Mr. Wilson applied to American Brokerage Services, Inc. and his policy was sold for \$75,000. He was able to recover all of the premiums paid into the policy, plus a handsome profit. Mr. Wilson used the proceeds to pay off some debts, go on vacation, and add more funds to his retirement portfolio.

Life Settlement - Unplanned Health Change

Dave was 76 and had just suffered a heart attack, which left him permanently disabled. His family was unprepared for this unfortunate turn of events. After learning of the Medicaid requirements and the cost of a care facility, the family was unsure how they were going to pay for his care.

Fortunately, the staff at the care facility suggested the life settlement option to Dave's family when they found out about his \$500,000 life insurance policy. The family received a \$250,000 settlement, and eliminated the premium payments. These funds covered the three years Dave resided in the facility before his passing. The remaining funds were distributed to Dave's original beneficiaries.

Life Settlement-A Partnership Buy/Sell Agreement

Two friends had been business partners for many years. Eventually, they decided to fund a buy/sell agreement and each partner purchased a 20-yr term policy worth five million dollars insuring the other partner. Years later, they sold their business and retired. They no longer required the policies and began to look at their options.

Instead of lapsing the policies and receiving nothing, the partners pursued a life settlement. The 75-year-old partners sold their policies for \$200,000 and \$150,000. Each partner used these funds to supplement their current retirement income.
